

SUPERTEC under the Brand **ALPINA** is specialized in the design and also construction of machines and complete plants for the production of building materials. During the last 30 years, **ALPINA** has provided turnkey projects all over the world, from engineering to manufacture and execution, in the following industrial business segments :

- *Heavy clay*
- *Aerated Autoclaved Concrete (AAC)*
- *Prefabricated clay walls*

4 main activities are:

1. **INDUSTRIAL TECHNOLOGIES**

- Automatic systems for manufacturing process of heavy clay products
- Systems for the production of sand-lime blocks and for aerated autoclaved concrete
- Automatic systems for manufacturing process of prefabricated walls

2. **ROBOTS AND AUTOMATIC CONTROL**

- Control boards of industrial process
- Industrial automation
- Drive and control boards of cogeneration modular sets

3. **BURNING SYSTEMS for:**

- **Coal and biomass fuel**
- **Gas fuel**
- **Oil fuel**

4. **PACKAGING AND WAREHOUSING SYSTEMS** (logistics and automatic warehousing systems)

- Packaging with shrinkable film
- Packaging with extensible film
- Modular automatic Stores
